

OncoStem CanAssist Breast

TRUSTED BY MORE THAN 400 SOUTH ASIAN ONCOLOGISTS

MESSAGE FROM CEO

Greetings from OncoStem!

I am excited to share that CAB is now validated on more than 2500 patients with the completion of 3 key European studies of which one is a cohort from a large randomized prospective clinical trial. We published a key paper showing the performance of CAB in various clinical sub-groups (clinically low-risk, high-risk and luminal sub-groups). CanAssist Breast is now also sold in Turkey- a new geography besides India, Sri Lanka, Bangladesh and UAE to plan treatment for breast cancer patients in the real world. We have already doubled new prescribers this year by reaching out to new territories like Punjab, Chhattisgarh, Jammu. In the coming year, we plan to further increase sales by strategic tie-ups, launch CAB in select Asian and Middle Eastern countries. Patients who completed 5 years post use of CAB are all doing well which is a huge testament of accuracy of CAB. On the R and D side, we will get closer to launching additional tests in our portfolio.

I sign off by thanking our dedicated team of employees and all of you for your trust and support. I look forward to strengthening our association in 2022!

Please do not hesitate to reach out in case you have any feedback for us. Stay safe and healthy.

DR. MANJIRI BAKRE

Prognostication In Breast Cancer Where we are right now?

Why CanAssist Breast?

- Validated on Indian patients
- Made in India, made for India
- CEP 9 breast cancer prognostic test developed & validated on Indian patients
- Fast turnaround time & affordable
- Regulatory approvals:
 - CE Mark
 - ISO 15189
 - INABL
 - CAP (College of American Pathologists)
- Patent protected
- Patent granted: US Patent #9,772,454 & India Patent No. 303377
- Patent in process pending in Europe, China, Australia, South Korea, Hong Kong
- Publications and abstracts:
 - ASCP 2021: CAB in an annotated HR2 platform
 - The Breast 2021: Validation of CAB in Indian cohort
 - Cancer Medicine 2020: Issue 19: "CAB: OX companion"

CanAssist Breast featured in Indian Medical Association Gujarat State Branch on 30th September 2021

CanAssist Breast - a 'Made in India' test is helping patients to avoid non-beneficial chemotherapy Precision oncology company, OncoStem Diagnostics completes 5 years since launch of CanAssist Breast and results look excellent.

By: OncoStem Diagnostics Private Limited

BANGALORE, India - September 2021 - in Bulletin of Indian Medical Association Gujarat State Branch. Breast cancer is the commonest cancer and the leading cause of cancer-related mortality among Indian women. Approximately 95% of early-stage hormone receptor positive breast cancer patients in India get treated with chemotherapy but nearly 80% of them do not need it and bear severe toxic side in effects resulting in poor quality of life. Accurate prediction of 'risk of recurrence' in these patients can aid in an effective treatment planning. **CanAssist Breast (CAB)** is a cost-effective prognostic test that helps to find if the patient needs chemotherapy to prevent relapse of cancer or can simply avoid it.

As of date, CAB has been used to plan treatment on 1600+ patients in India, Sri Lanka, Bangladesh, Pakistan, Turkey and nearly 70% of them have been saved of perhaps the non-beneficial chemotherapy. Interestingly, early data on patients who have finished 5 years since its use has shown that CAB was 100% accurate in identifying the patients who do not benefit from chemotherapy.

Dr. D.G Vijay who is a Senior Consultant, Breast Services, HCG Ahmedabad says "CanAssist-Breast, developed by an Indian company called OncoStem Diagnostics, is well validated and affordable"

Every year October marks Breast Cancer Awareness Month, an international campaign to raise awareness for early detection of Breast Cancer.

OncoStem took an initiative where we urged our employees to share their personalized handwritten message for all the breast cancer survivors as part of supporting this #Shoutoutpink campaign.
