

OncoStem CanAssist Breast

TRUSTED BY MORE THAN 382 SOUTH ASIAN ONCOLOGISTS

MESSAGE FROM CEO

Greetings from OncoStem!

My team and I have not been able to meet you face-to-face at conferences or CMEs this year, hence I wanted to take this opportunity to share some updates on OncoStem. I am happy to share that we have increased our prescriber base by 8% this Quarter. CanAssist Breast sales have been expanded to Asian and Middle Eastern countries like Nepal, Dubai and Turkey during the past quarter.

We are excited to inform you that we completed 5 year follow-up for our first patients whose treatment was planned as per CanAssist Breast in 2016. The patients who had been classified as low-risk by the CanAssist Breast and hence avoided chemotherapy have been doing well without any recurrence.

We published a key paper showing the validation of CanAssist Breast in ethnic Indian population accepted in the journal "The Breast". Once again I want to assure you that our goal at OncoStem is to ensure that patients receive personalized treatment in a timely and affordable manner and we continuously strive for expanding our presence in the global market.

Please do not hesitate to reach out in case you have any feedback for us.

Stay safe and healthy.

DR. MANJIRI BAKRE
Founder & CEO,
OncoStem Diagnostics
